Education

VIT Bhopal University Bhopal, MP
*Int.Mtech in Computer Science Engineering in Cyber Security – **8.80** CGPA* *October 2022 –*

SNDP HSS Udayamperoor Ernakulam, Kerala
*Class XII – **99.33%*** *June 2019 – March 2021*

Georgian Academy EMHS, Thiruvamkulam Ernakulam, Kerala
*Class X - **100%*** *June 2018 – March 2019*

Technical Skills

Python, C++, HTML, Cryptography, Network Security

Certificates

Python, Cyber Security, Computer Networks, Network Defense

Projects

Modified Block Cipher | *Python, HTML/CSS* *Oct 23 – Nov 23*

- Designed and implemented a block cipher that divides data into four blocks, enhancing encryption, flexibility and security. Integrated key length functionality based on requirements.
- Improved encryption robustness by developing a flexible block cipher with dynamic key length adjustment.

URL Analysis Using ML | *Python, Machine Learning, HTML/CSS* *Jan 24 - May 24*

- Developed a website for phishing link detection, leveraging machine learning to identify and analyze suspicious URLs.
- Enhanced online security by creating a functional platform that improves user awareness and accurately detect phishing links with accuracy around 92%.

ML Based Threat Detection in Crowded Environments | *Python, Machine Learning, Computer Vision, TensorFlow* *July 24 - Apr 25*

- Developed a machine learning-based system to detect anomalies and violent activities in crowded environments, enabling real-time threat identification and alert generation.
- ML-based system detected anomalies with 83.1% accuracy, enabling real-time alerts; research published at ICSTSDG 2024.

QR Event Check in System | *Python, JavaScript, HTML/CSS* *March 24*

- A QR code-based check-in system that verifies event attendees by scanning unique, email-sent QR codes, logging entries with timestamps and preventing duplicates via real-time CSV updates
- Achieves secure, contactless event check-ins by validating unique QR codes in real-time, logging verified attendee data to CSV while preventing unauthorized access – all synced across multiple scanning devices.

Work Experience

Ethical Hacking Internship *Jun 25 –*

- Hands-On Security Training – Performing authorized penetration testing, vulnerability assessments, and security audits on live systems under supervision.
- Real-World Threat Mitigation – Documenting exploits, recommending patches, and contributing to cybersecurity reports for organizational improvement.
- Tool Mastery – Gaining proficiency in Kali Linux, Metasploit, Wireshark, and OWASP tools while adhering to legal/ethical guidelines.

Hobbies & Languages

- Reading, Music, Travelling
- English, Malayalam, Tamil
